PROJECTS

Book Store - http://ernestit-bookstore.netlify.app

A frontend react application that is built using itbook.store api (api.itbook.store) to show my understanding of working with RESTful APIs while working with React. This frontend application was also implemented using react Context API to manage state.

E-Shop - https://ernestshop.netlify.app/

A frontend e-commerce application. It was built using HTML5, CSS3, React JS, Bootstrap4 and jQuery.

Diagnosis System

This is an expert system that diagnoses heart diseases using multi-criteria decision-making technique. This web application was implemented using Python (Django), jQuery, HTML, CSS. It also makes use of Support Vector Machine (SVM) and Logistic regression algorithm to make predictions. It was a teamwork of I and a data science engineer.

GitHub Users - https://searchgit-profile.netlify.app/

This is a small application that enables users to search for GitHub users with their usernames. This was implemented using React.
